Professional Summary

Software Development graduate currently working as a Systems Installation Engineer. Experience installing systems, troubleshooting technical issues, and working with Windows, Linux, and networking. I also run a personal home lab where I manage servers, networking, and self-hosted services to build practical infrastructure experience.

Technical Skills

Systems: Windows, Linux, hardware installation, troubleshooting
Networking: TCP/IP, DNS, DHCP fundamentals
Infrastructure: Docker, self-hosting, reverse proxies, VPN setup
Development: C#, ASP.NET Core, Entity Framework, Angular, TypeScript
Tools: Git, Azure DevOps, VS Code, Neovim

Experience

Systems Installation Engineer	CBE	Current
• Install and configure technical systems • Troubleshoot installation and configuration issues • Work on-site as part of installation projects • Document completed technical work		
Software Developer Intern	Department of Social Protection, Sligo	Apr 2023 – Sep 2023
• Developed backend functionality in C# using .NET Web API • Automated build processes with PowerShell and Azure DevOps • Tested legacy systems and wrote documentation • Worked in Agile team environment		
Commis Chef	Langs Bar & Restaurant, Grange	Mar 2018 – Present
• Work in fast paced team environment • Manage time during busy service periods • Communicate clearly with team members		

Infrastructure Experience (Personal)

Personal home lab used to develop systems knowledge.

- Manage Linux servers
- Run services using Docker
- Configure DNS and networking
- Set up reverse proxies
- Configure WireGuard VPN
- Troubleshoot service and network issues

Education

BSc (Hons) Software Development	Atlantic Technological University Sligo	Graduated 2024
--	--	-----------------------

Projects

LogIt (In progress)	React, Capacitor, SQLite
• Workout tracking app with offline support • Local data storage and custom editor features	
E-Learning App	Ionic Angular, Azure
• Mobile and web learning platform • Cloud hosting and CI/CD setup
